Actionscript  
Wordpress

### Theory & Working Knowledge

Typography  
Color Theory  
Illustration  
Usability Engineering

### Cross-Platform

Mac  
PC

## RECOMMENDATION

*"Sean offered a refreshing combination of creativity and collaboration while designing a web site for me. He tactfully steered my ideas and requirements in a direction that worked best for the message I wanted to convey while explaining why one approach would work better than another. In Sean I found a professional demeanor with a relaxed collaborative approach that made the process easy. Sean was as casual or formal as the situation warranted. Sean supported my requirements through domain name registration, site hosting, site design, graphic/illustration selection, and site traffic monitoring. Sean should be considered one of your top choice..."*

*~Michael Berrier  
hired Sean as a Graphic/Web Designer in 2009*
